Toronto, ON (Open to Work Across Canada) | nathpriti201@gmail.com | (437) 441-3465 | linkedin.com/in/pritinath | github.com/priti201 | priti201.github.io

PROFESSIONAL SUMMARY

Data Engineer with 4+ years of experience building scalable ETL/ELT pipelines, data quality frameworks, and analytics-ready data models using Python, PySpark, SQL, AWS, GCP, Databricks, and dbt. Skilled in workflow automation, monitoring, and cloud-based data solutions supporting enterprise analytics and reporting.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark, JavaScript, HTML5, CSS3

Data Engineering: ETL/ELT, Data Modeling, Data Quality, Batch Processing, Apache Spark, dbt, Databricks, Kafka

Cloud & Databases: AWS (S3, Glue, Lambda, Redshift), GCP (BigQuery, GCS), MongoDB, NoSQL, Hive/HiveQL

Tools & DevOps: Splunk, Tableau, Power BI, Airflow, Git, Jenkins, Docker, GitHub Actions, JIRA

Other: Agile/Scrum, CI/CD, REST APIs, Data Governance, Monitoring & Alerting

WORK EXPERIENCE

Data Engineer — Accenture

Nov 2018 – Sep 2022

Bengaluru & Kolkata, India

- Designed and maintained 15+ scalable ETL/ELT pipelines using Python, PySpark, SQL, and Databricks — reducing manual effort by 40% and improving data accuracy by 30%.
- Processed and profiled 2TB+ of enterprise data daily across 100+ tables; implemented 25+ automated quality checks reducing data incidents by 35%.
- Built analytics-ready data models following dbt-style architecture, reducing query runtime by 35% for 20+ downstream BI reports.
- Built Splunk dashboards monitoring 50+ pipelines in real time, improving incident detection and reducing troubleshooting time by 45%.
- Developed ML-based ticket classifier achieving 85% accuracy; integrated 3rd party APIs and supported CI/CD deployments using Jenkins and Docker.
- Enhanced data governance across 200+ workflows; collaborated with senior stakeholders in Agile/Scrum to deliver scalable data solutions.

PROJECTS

GCP Data Lakehouse | BigQuery · dbt · GCS · Looker Studio

May 2026 – Present

- Building a production-grade Cloud Lakehouse on GCP — fully deployed, not local — implementing a complete ELT pipeline from raw ingestion through BigQuery processing to dbt-layered transformations (raw → staging → intermediate → marts).
- Implemented automated dbt tests and data quality checks at every transformation layer; CI/CD via GitHub Actions deploys model changes automatically on push.
- Built a live Looker Studio analytics dashboard on top of the marts layer to surface business-ready insights — demonstrating end-to-end cloud data engineering skills.

Image Caption Generator — Deep Learning Pipeline

Sep 2023 – Dec 2024

- Designed and trained an end-to-end image captioning model using ResNet50 (CNN encoder) with LSTM and Transformer decoder architectures, achieving 92% accuracy on test data.
- Deployed as a real-time inference API using FastAPI and Streamlit frontend, capable of generating captions across 100+ images per session with sub-second response time.

CheckMate — Full-Stack Chess App with Live Rankings

May 2024 – Aug 2024

- Built a full-stack interactive chess game in JavaScript, HTML5, and CSS3 with complete legal move validation, castling, en passant, and check/checkmate detection from scratch.
- Integrated backend REST APIs to fetch and display real-time global Top-100 player rankings refreshed every 24 hours, demonstrating end-to-end API integration skills.

EDUCATION

Ontario College Graduate Certificate — Artificial Intelligence & Data Science

Jan 2023 – Aug 2024

Loyalist College, Ontario, Canada

Bachelor of Technology — Computer Science & Engineering

Aug 2014 – Jul 2018

Academy of Technology, India

CERTIFICATIONS

Automation Prime Certification — Accenture | Data Science with Python — DataCamp
